

Experiment No. 7

Aim: To Create Scrum Board for Scrum Master using JIRA Tool.

Theory:

To create a Scrum Board for a Scrum Master using the JIRA tool, you need to follow these steps:

Create a Scrum Project in JIRA:

Log in to your JIRA account and select a template from the library, choosing the Scrum template.

Once the project is created, you will land on the empty backlog, also known as the product backlog, containing a list of potential work items for the project

Create User Stories or Tasks in the Backlog:

In JIRA, work items like user stories, tasks, and bugs are referred to as "issues." Create user stories using the quick create option on the backlog.

User stories describe work items in a non-technical language from a user's perspective, following the format: "As a {type of user}, I want {goal} so that I {receive benefit}"

Prioritize User Stories in the Backlog:

After creating user stories, prioritize them by ranking or dragging and dropping them in the order they should be worked on.

The product owner usually prioritizes user stories, and the development team estimates the effort required to complete each story

Create a Scrum Board in JIRA:

Click on Search > View all boards and then Create board.

Select the board type as Scrum and choose whether to start with a new project template or add the board to existing projects.

Configure columns and quick filters to reflect your team's process and focus on specific issues quickly

Navigate Between Boards:

Use the board switcher located in the left-hand menu under the project name to move between different boards in JIRA

By following these steps, a Scrum Master can effectively create a Scrum Board in JIRA, enabling efficient management of tasks, user stories, and sprints within the agile project management framework.

The image displays two screenshots from the Atlassian ecosystem. The top screenshot shows the 'Select a template for your first project' page on the Atlassian Admin console. It offers three templates: KANBAN (a simple board to visualize workflow), SCRUM (deliver work in short, repeatable time blocks), and BUSINESS (collaboration for business teams). The bottom screenshot shows the 'Platform experiences' page in the Atlassian Admin console, listing a single experience with the URL 'https://ediyadikonda711.atlassian.net' and an activation date of 'Mar 25, 2025'. Below this, a 'Welcome!' screen in Jira prompts the user to name their project (pre-filled with 'Experiment 5') and select their familiarity with Jira (options: Not familiar, Somewhat, Familiar). A 'Get started' button is visible at the bottom of the welcome screen.

Select a template for your first project

If you're not sure what to choose, don't worry. You can quickly create a new project if this one's not right for you.

KANBAN
A simple board to visualize your workflow
A flexible and efficient way to manage agile work, with a board and timeline.
POPULAR

SCRUM
Deliver work in short, repeatable time blocks
Plan, prioritize, and schedule work using agile sprints with a backlog, board and timeline.

BUSINESS
Collaboration for business teams
Designed to help your business team collaborate and connect, with list and calendar views, forms, and more.

Board List Timeline Backlog

Your backlog is empty.

+ Create issue

The first screenshot shows the 'Choose a topic' dialog box in Jira. The dialog has a 'Description' section with a text input field and a 'Details' section with various fields like Assignee, Labels, Parent, Team, Sprint, Story point estimate, and Reporter. The 'Assignee' field is set to 'Aditya Dikonda' and the 'Reporter' is 'ashish279338'. The 'Sprint' is 'SCRUM Sprint 1'. The 'Details' section also includes a 'Pinned fields' section with a note to click on the star icon to start pinning.

The second screenshot shows the 'Add Flag' dialog box. The dialog has a text input field with the text 'Not a good topic'. The 'Confirm' button is highlighted in blue.

The third screenshot shows the 'SCRUM Sprint 1' board in Jira. The board has a 'TO DO' column with four items: 'Choose a topic', 'Research on the topic', 'Implementation', and 'Review'. The 'Choose a topic' item is highlighted in yellow and has a red flag icon. The 'Research on the topic' item is also highlighted in yellow and has a red flag icon. The 'Implementation' and 'Review' items are not highlighted. The board also has 'IN PROGRESS' and 'DONE' columns.

The image displays two screenshots of the Jira Scrum project timeline view for a project named 'Experiment 5'.

Top Screenshot: Shows the 'Timeline' view with a calendar grid for February, March, April, and May. A 'SCRUM Sprint 1' is visible, spanning from the end of February into March. The left sidebar shows the 'PLANNING' section with 'Timeline' selected. The top navigation bar includes 'Your work', 'Projects', 'Filters', 'Dashboards', 'Teams', 'Plans', 'Apps', and a 'Create' button. A search bar and a '10 days left' indicator are also present.

Bottom Screenshot: Shows the same 'Timeline' view, but with a detailed tooltip for 'SCRUM Sprint 1' open. The tooltip indicates it is an 'ACTIVE SPRINT' and provides the 'Sprint start' date as 2025/03/25 and the 'Sprint end' date as 2025/04/08. The rest of the interface remains the same as the top screenshot.

Conclusion:

Scrum project was implemented using JIRA.
